Workshop on Modeling of National Resilience System and Simulation on the Public Policy a well as Draft of MOU between Lemhannas RI Governor and the Governor of Provinces entire Indonesia

Governor of Lemhannas addressed remarks in the opening program of Workshop on National Resilience System Modeling and Public Policy Simulation

Workshop on Modeling of National Resilience System and Simulation on the Public Policy in Dwi Warna Purwa Building Lemhannas RI on October 27, 2009 was opened by Lemhannas RI Governor Prof. DR. Muladi, SH and attended by the Heads of Provincial Development Planning Agency at district/province level (Bappeda), Head of Provincial Central Bureau of Statistics and representatives of Universities from 33 Provinces throughout Indonesia.

Now, Lemhannas RI is building a National Resilience Measurement Laboratory (LABKURTANNAS) that will have function to monitor and analyze the National Resilience rate/index in Regions in 33 Provinces through multi-dimension approaches. In addition, Lemhannas RI is making draft of MOU between Lemhannas RI and all Governors of Provinces in Indonesia. They are in line with consideration that it is necessary to increase our National Resilience, while hitherto there is not yet adequate information system to detect the National Resilience, and impact of strategic environmental change, whether in regional, national and global levels in the interest of National Resilience. Such information is very vital as input material for the President in making decision, allowing him to be able to immediately determine the accurate anticipatory measures/steps (Anticipatory Resilience), to deal with the strategic environmental change occurring to avoid the impact of the decrease in National Resilience.

Very fast and complex change sometime unexpectedly occurs to the strategic environmental change that in fact highly influences the Indonesian National Resilience condition, whether aggregately or partially in each dimension, such as global financial

crisis that is highly unpredictable recently, so it not only affects the Economic Resilience, but also by matrix affects the Resilience in socio cultural, political even the security dimensions.

Along with its main function and task, since 2007, Lemhannas RI feels that it has obligation to build such information system which will measure the national resilience and the information system is going to be operated by the national resilience measurement laboratory. This Laboratory expectedly becomes one of core programs, besides the other core programs that must be accomplished until 2010. The result of National Resilience Measurement is hoped to give the accurate information about the level of the national resilience at the regions of all provinces so it could be able to be used as early warning system for central government and region government.

Labkurtannas construction is the development of National Resilience Measurement System that is currently only used as *academic exercise* for the participants of Short Batch Education Program and Regular Batch Education Program. The benefit for the Regional Government is that this system is not only as early warning system but it can also be used as information source of regional planning, especially in determining the development priority.

It is impossible for Lemhannas to carry out the measurement system single-handedly, but it must be in a networking/corporatness and inter-connected, by involving experts from the University, Indonesian Institute of Science (LIPI) and the stakeholders from the relevant Departments, such as: Indonesian National Development Agency (Bappenas), Central Bureau of Statistics (BPS), Ministry of Health etc.

There are several matters that must be examined and reviewed, whether about the dimension, variable, indicator, parameter even instrument already developed by Lemhannas RI.

One of Workshop's participants asked a question and gave suggestion

INDONESIA IN THE FUTURE: STUDENT REGIMENT'S ROLE

Lemhannas RI Governor Prof.DR. Muladi, SH posed with the Indonesian Students Regiment for picture taking in Rakernas program on October 14, 2009 at Dwi Warna Purwa Building Lemhannas RI

Lemhannas RI Governor Prof. DR. Muladi, SH, when opening the National Meeting of the Student Regiment activity stated the vision of the national development for period of 2000-2005 according to the Law No. 17 of 2007, describing the Indonesian condition in the future as “an independent, modern, just and prosperous Indonesia”, in the Unitary State of the Republic of Indonesia (NKRI) based on Pancasila and Constitution of 1945, therefore it should be supported by:

1. Commitment of strong and democratic national leadership.
2. Consistent government's policy;
3. People oriented; and
4. Active community's and business world's participation.

To materialize it, there should be the role of qualified youth as “potential leaders” in the future, especially as the “driving force” of the national development. But the intellectual young generation must also be aware that as the reformist group determining the success of transformation toward the prosperous, democratic and transparent community, they do not stand alone. It is worth noted that it is accelerated evolution system, not the revolution system that is used in the reform process in Indonesia. Lemhannas RI's Governor also confirmed to all components to be aware of many threats that simultaneously as opportunities for Indonesia in the future. It should be realized that anyone, including young generation who wants to become the nation leader in the future should take part to make a change and attain the national objective.

USE OF E-PROCUREMENT IN LEMHANNAS RI

Relating to the President Decree No. 80 of 2003 regarding Goods and Service Procurement in the Government Institution financed by the State Budget, Lemhannas RI entered into cooperation with PT. Sucofindo for use of IT based computer in the interest of Goods and Service E-Procurement in Lemhannas RI on October 13, 2009.

The benefit of E-procurement application is one of realizations of E-Government application in government environment, therefore the goods and service procurement is transparent and open, as well as for more effective and efficient goods and service procurement process.

As demand for fast ICT development in many life and work aspects, so the community is able to see the list of goods and service procurement wholly and clearly. This E-Procurement for the goods and service procurement can be made on online basis via internet and integrated to the assets management.

The participants of E-Procurement Training are looking at the description in the Telematic Computer Laboratory of Lemhannas RI

Overseas Strategic Study (SSLN) Lemhannas RI Left For the Philippine

Chairman of Group and Representative of SSLN's participants posed with several staffs of one of the Philippine Government agencies for picture taking after the visit activity program finished

98 participants of the Regular Education Program (PPRA) Batch XLIII year 2009 including 4 (four) participants from the fellow countries namely from Australia, Malaysia, Thailand and Singapore before the end of their training conducted one of main activities namely Overseas Strategic Study (SSLN) to Australia, China, the Philippine, Vietnam and Brunei Darussalam on October 11 to 16, 2009.

The Newsletter of this edition presents the result of SSLN visit to the Philippine. It is since this country has many problems from many national aspects causing disorder to its national stability, especially the security problem. From the series of its five-day visit, there is a lot of valuable insights and knowledge gained by PPRA participants.

During that state visit, there were several places struck by natural disaster namely flood, but SSLN participants group remained able to carry out all activities well according to the program prepared.

SSLN participants group visited many the Philippine Government agencies namely visiting Subic and Clark, namely ex military base of the United States of America already closed since 1992 since the Philippine parliament denied the application for contract extension. Now, both are developed to become special economic zone and free port that is very vital for the economic development in the Philippine.

The other visit was to the government agencies (Department of Trade and Industry/DTI) and ARMS Corporation of the Philippine (ARMSCON) namely a state company producing weapon. From two places, it was gained information about the policy, strategy and advancement gained by the Philippine Government in trade, industry and independence in the domestic armament supply.

The other interesting visit was the visit to three Philippine government agencies: namely the National Defence College of the Philippines (NDCC), Department of Interior Local Government (DILG) and Office of the Presidential Advice on Peace Process (OPAPP).

From the visit to NDCC, the group gained explanation on:

1. "Philippine Defence Policy: Strategic Outlook, issues and Challenges" by Gladys Cagadoc (from the Office of the Assistant Secretary for Plans and Programs, DND).
2. "Vision, Mission, Organization and Activities of NDCC" by Atty Priscilla Duque, MNSA from OCD.
3. "NDCC Mission, Organization and Functions" by Mr. Clarence Anthony P. Dugenia (Defence Research officer, NDCC).

Exchange of souvenirs between the delegation of Lemhannas RI and Hon Ronaldo V. Puno, (Secretary of DILG) and Gen Jesus A. Verzosa (Police Chief Director)

INAUGURATION OF RELOCATION OF STATUE Ir. SOEKARNO THE FOUNDER OF LEMHANNAS RI AND RENOVATION LEMHANNAS RI NAME BOARD

Lemhannas RI Governor Prof.DR. Muladi, SH inaugurated Relocation of Sculpture Ir. Soekarno, the Founder of Lemhannas RI in Asta Gatra Building, Lemhannas RI.

Coincident with commemorating the Hero Day November 10, 2009, without decreasing or eliminate the historical context of its early development idea, it was inaugurated the renovation of Lemhannas RI's name board and relocation of statue Ir. Soekarno to the central part of Lemhannas RI complex, exactly in front of Astagatra building currently constituting the main operational building for many activities starting from the training, assessment, strengthening of the nation values, ICT, library and secretariat.

Renovation of Lemhannas RI's name board and reposition of sculpture Ir. Soekarno is the most appropriate moment when this nation commemorates the hero day, since it is as a symbol to respect and eternalize the heroic attitude he showed as the nation hero, independence proclaimer, nation leader and patriot as well as State Policeman especially in gaining and maintaining the Indonesia's independence.

The relocation of sculpture Ir. Soekarno at the better place is to allow us to easily commemorate him and to grow the inspiration as well as understand the moral message therein. Brigadier General Police. DR.H.M. Said Saile, M.Si as the Committee Chairman for Inauguration of relocation of sculpture Ir. Soekarno and renovation of Lemhannas RI's name board addressed that this activity was inspired by the idea of Prof.DR. Muladi, SH, Lemhannas RI Governor to appreciate the founder of Lemhannas RI, that among others the respectful placement of sculpture Ir. Soekarno originally at the border fence between Lemhannas RI and office of Governor of DKI Jakarta and it was relocated to Asta Gatra Building Lemhannas RI.

Opening of new Lemhannas RI Name Board cover

ACTUALIZATION OF CHECKS AND BALANCES AMONG EXECUTIVE, LEGISLATIVE AND JUDICIAL INSTITUTIONS POST GENERAL ELECTION OF 2009 TO SUPPORT THE SUCCESS OF STRATEGIC POLICY ON NATIONAL DEVELOPMENT 2010-2014

Roundtable Discussion on Social and Culture with theme "Actualization of Checks and Balances Among Executive, Legislative and Judicial Institutions Post General Election of 2009 to Support the Success of Strategic Policy on National Development 2010-2014" was opened by Lemhannas RI Governor dated October 27, 2009 in the Meeting Room Nusantara I Lemhannas RI

Lemhannas RI Governor Prof.DR. Muladi, SH in the Roundtable Discussion in Lemhannas RI on October 27, 2009 addressed that the Actualization of Checks and Balances among the State institutions is considered effective if each institution is able to perform its main task and function well. It is indicated by two factors; first the increase in the institution performance in gaining a good solution to resolve the problem, and the second, the Policy prepared is formulated according to the rational decision.

To materialize the Actualization of Checks and Balances among the state institutions, it is necessary to take into account the principles as follows: **First**, Wholism and Unity; **second**, interrelatedness; **third**, Purposive behavior; **fourth**, Openness; **fifth**, Value Transformation, and **sixth**, Control mechanism.

The actualization of checks and balances is necessary since currently each state institution does not yet to the not optimally develop the organization behavior supporting the decision rationalization. It can be seen from many evaluations to the state institution performance, whether the Legislative, Executive or Judicial performance continuously (Steady State). To this end, the Actualization

of Checks and Balances requires the balance of inter-state institution position, not closed system in which the interaction with the environment is very small, so it can be neglected, and in performing its function, it must be open (Open System).

Scrutinizing the process of General Election 2009 and factual as well as actual condition of the institution relationship pattern currently, unless rational and proportional attitude is immediately taken, it will inhibit the national development even render the national instability. The current experience indicates the tension between Supreme Court and Finance Audit Board (BPK) relating to the problem on implementation of the function and authority, House of People's Representative (DPR) RI and Government (the President of the Republic of Indonesia) marked by the use of inquiry right without clear direction, the latest is the tension between General Elections Commissions (KPU) and Supreme Court (MA), and there are still many cases indicating that Checks and Balances in the institution currently do not yet grow and develop well, therefore it is necessary to immediately apply and develop Checks and Balances principles in the State Institutional Behavior.

LEMHANNAS RI GOVERNOR OPENS PROGRAM OF NATIONAL COMMISSION ON VIOLENCE AGAINST WOMEN

Lemhannas RI Governor Prof.DR. Muladi, SH opened the National Commission on Violence Against Women (KOMNAS Perempuan) immediately for public test of Qanun Jinayat, on Thursday, October 29, 2009 at Trigatra Building, IIIrd Floor Barat, Lemhannas RI. The KOMNAS Perempuan in conducting the research and inventory taking as well as criticizing further the formulation of Qanun and other Provincial regulations, especially those are felt discriminative that always have negative connotation (exclusion or rejection). Whether in terms of treatment to someone from certain group based on the class or category consideration such as: race, ethnic, gender, language, religion, political affiliation, origin, wealth, birth, or other status, breaching the "equality before the law", it means that everyone shall have right to be free from discriminative treatment based on anything and right to obtain protection from the discriminative treatment.

Feminism movement is a universal movement since 1990 based on the empirical experience of the women who always become the victim of discriminative act as "global issue". Qanun Jinayah together with law procedure of *qanun* is based on the Islamic law in Nangroe Aceh Darussalam. In its discussion, there are many controversies. For those opposing, they demand Qanun should be revised since it contains several sanctions (physical punishment), while such draft is not yet socialized to the community and only touches the lower class group as well as there is impression that the draft was made hastily by DPRD, while Qanun Jinayah is not the answer for Aceh's community need for moral and social problem potentially generating new conflict and not securing the legal assurance (multi interpretation), as well as directing to criminalization of not guilty person especially female. While for those supporting Qanun, state that: the community unnecessarily denies Qanun Jinayah, if there is no intention to commit adultery, why so worried. The effectiveness of this Islamic law generates controversy in the national level marked by disagreement between those pro and contra. It must be admitted that finally it will relate the Constitution of 1945 confirming Pancasila as state foundation in the preamble and provisions on Human Rights(HAM) provided for after amendment.

Lemhannas RI Governor Prof.DR. Muladi, SH opened Program of Study of Law about Qanun Jinayah in Lemhannas RI accompanied by the organizer committee from KOMNAS Perempuan on October 29, 2009.

REVISION TO ACCOUNTABILITY REPORT ON GOVERNMENT AGENCY'S PERFORMANCE (LAKIP) OF 2008 AND PREPARATION OF LAKIP 2009 LEMHANNAS RI

Brigadier General Police Drs. Alpiner Sinaga was chairing the Early Discussion Meeting of Revision to Lemhannas RI Performance Indicator of 2008 on October 20, 2009 in the Nusantara Meeting Room II Lemhannas RI

For the implementation of the clean and authorized governance, the Inspectorate of Lemhannas RI makes revision to LAKIP Of 2008 and preparation of LAKIP 2009. The program was opened by the Brigadier General Police Drs. Alpiner Sinaga and continued with the description on result of Evaluation to the State Ministers of State Reform for the Accountability of Lemhanas RI Performance of 2007. Five components assessed in the evaluation the State Minister of State Reform for Lemhanas performance accountability are, First, Performance planning, Second, Performance Measurement, Third, Performance Reporting, Fourth, Performance Evaluation, Fifth, Performance attainment. The revision to LAKIP 2008 and preparation of LAKIP 2009 Lemhanas RI has a Strategic Plan covering: objective, target (description and indicator), policy and program. The materialization of obligation of a government agency to account for the success/failure of implementation of organization's mission in attaining the objectives and targets already stipulated, through an accountability media periodically. LAKIP has four systems: **first** Performance planning, **second** Performance measurement, **third** Performance reporting, **fourth** Evaluation and utilization of information on performance.

The instruments in measuring the accountability with target of AKIP system implementation are, **first**, making the accountable government agency thereby able to run efficiently, effectively and responsively to the community's aspiration and its environment; **second**, materializing government's agency transparency; **third**, materializing the community's participation in the national development program; **fourth**: maintaining the community's trust to the government.

GENERAL POLICY OF GOVERNING BOARD OF NATIONAL RESILIENCE INSTITUTE OF REPUBLIC OF INDONESIA

Lemhannas RI Governor Prof.DR. Muladi, SH accompanied by the Members of Directing Board Prof.DR. Malik Fajar, opened the Intellectual Exercise Discussion of National Alertness and National Resilience Aspects on October 25, 2009 in Astagatra Building, IIIrd Floor Barat Lemhannas RI

Based on the Presidential Regulation of the Republic of Indonesia number 67 of 2006 dated June 13, 2006 regarding Lemhannas RI, it was explained that the organizational aspect of Lemhannas RI enters the 3rd year before 5 (five) years, so the first phase evaluation/2009 will be made. According to the Decision of the Governing Board of Lemhannas RI No.: Skep/03/XII/2008 dated December 18, 2008 regarding General Policy of the Directing Board of the National Resilience Institute of the Republic of Indonesia for the Work Program and budget of Lemhannas RI Fiscal Year of 2009, the evaluation is directed to the competency of the civil servant officer about the organization, task and function focused on the professional, proportional, effective, efficient, simple and modern. It was arranged by using the principles that all tasks are distributed thoroughly, proportional and not overlapping among the work units, or in one work unit. All elements in Lemhannas RI in carrying out their task shall apply the coordination, integration and synchronization principles to attain the task and function, whether in Lemhannas RI environment or in relation among the central and regional government agencies.

Second Phase/2010: Validation is directed to the effectiveness and efficiency of the Organization, Main Task and Function of Lemhannas RI. The implementation according to the organization, task and function starting from the Secretariat division, Deputy of Training division of National level, Deputy of Strategic Study division, Deputy of Nationality Values Strengthening, Lecturer and Assessor , Professional until Inspectorate of Lemhannas RI.

COMMEMORATION OF THE YOUTH PLEDGE

Eighty one years ago, namely on October 28, 2009, the youth association declared their pledge:

“We the sons and daughters of Indonesia, acknowledge one motherland, Indonesia. We the sons and daughters of Indonesia, acknowledge one nation, the nation of Indonesia. We the sons and daughters of Indonesia, respect the language of unity, Indonesian.” Since then, almost every year, this historical event is commemorated by the Indonesian people. Commemorating Youth Pledge is the very important and strategic historical event to build the change and reform to increase the sense of unity and integration of the democratic nation as well as re-reflect the historical journey to the young generation.

As the national ideology and State foundation, Pancasila is the nation tier and unifier. While the national ideas has strictly been formulated by five syllables: independent, united, sovereign, just and prosperous. To attain the national idea, the state founding fathers assigned the task to the state government to attain the national objective “to protect the Indonesian from bloody hostility, increase the public welfare, enlighten the nation life, as well as take part in conducting the international orderliness based on the independency, eternal peace and social justice.”

All are materialized through the sovereign and democratic state governance running by giving priority to the state unity and integration as well as based on Pancasila and Constitution 1945. Since the reform was made, the democracy has indicated the positive direction signalized by many changes in the community's, nation and state life.

The democratization triggers the growth of spirit to convey aspiration, and press freedom has made effective social control, and law and Human Rights (HAM) are continuously enforced. On the other hand, the reform is misinterpreted by part of community's groups thereby disturbing the national development running. In this respect, the commemoration of Youth Pledge of 2009, is among others intended to answer many weaknesses of development constituting the responsibility of all Indonesian people without exception including Lemhannas RI to increase the performance according to their respective main task and function optimally.

Lemhanas RI Governor Prof.DR. Muladi, SH Read Out the mandate for the 81st Youth Pledge Day on October 28, 2009.
