National Capacity : Economic Resilience

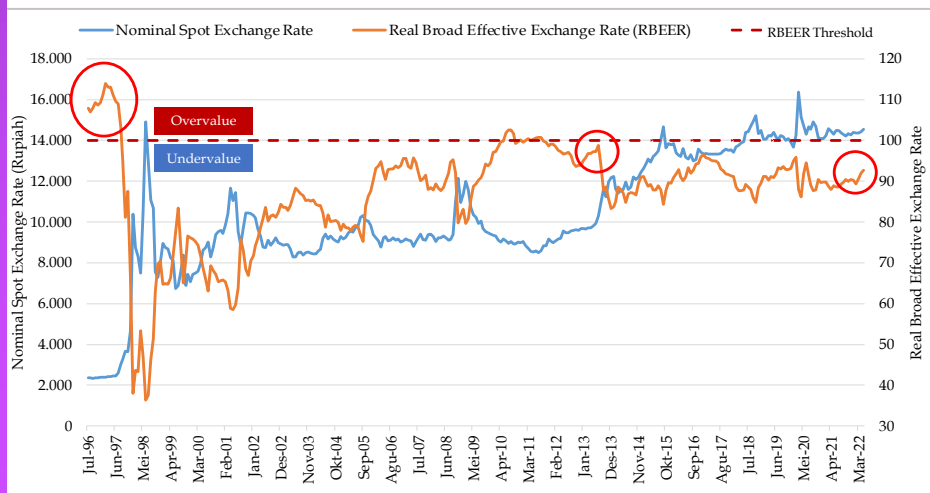

Indonesia's Economy Capacity

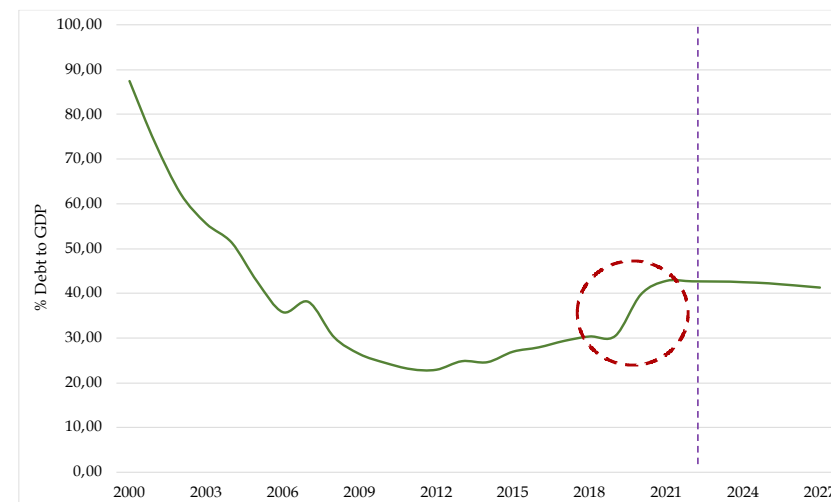

Indonesia's Position

- Ideal Economy**
 - Economic structural reforms
 - Fiscal reforms
 - Maintaining low interest rate
- Recovery/Expansion**
 - Export oriented economy
 - Maintaining subsidy
 - Increase the interest rate
- Recession/Contraction**
 - Increase the level of social aid
 - Maintaining low interest rate
- Stagflation**
 - Increase the level of social aid
 - Increase the amount of subsidy
 - Increase the interest rate

Rupiah Exchange Rate Stability

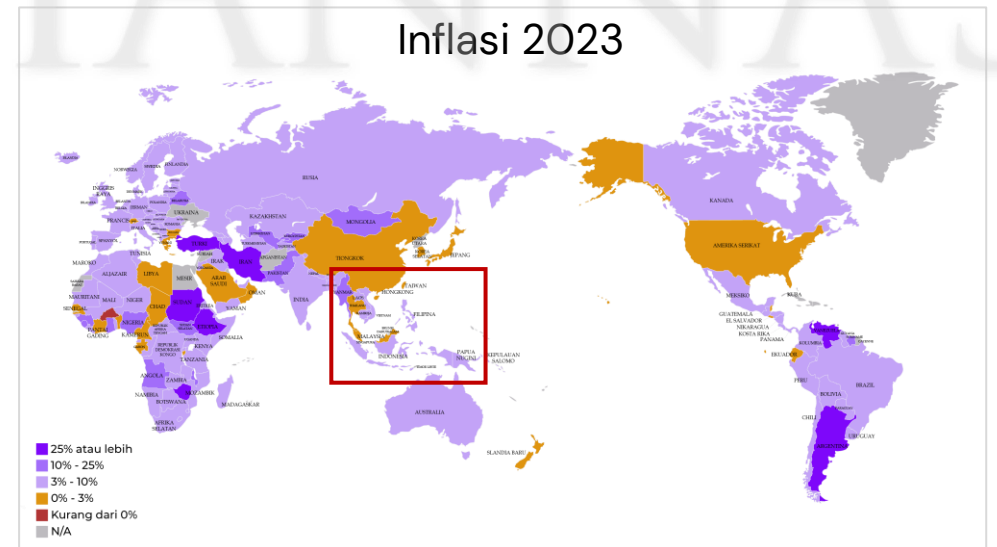

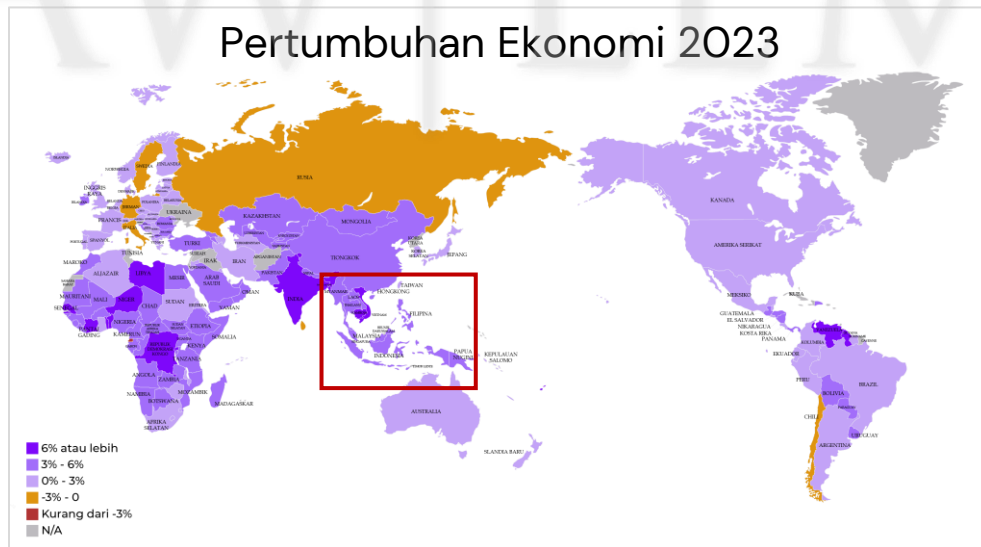

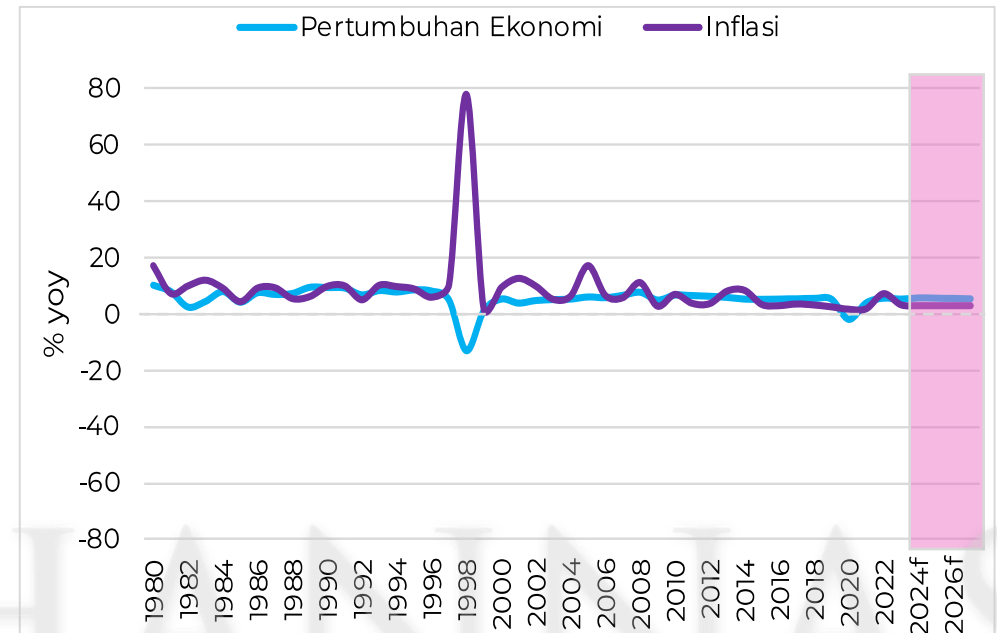

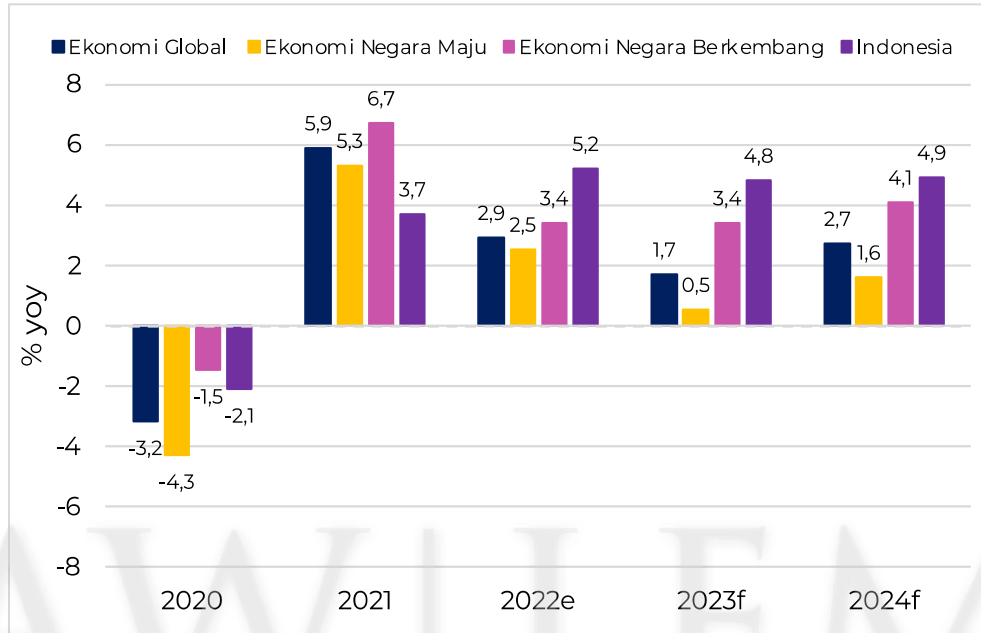

Debt Ratio

Indonesia needs to prepare facing a potential **economic slowdown** caused by the decline of household demand and consumption as the price increases. At the same time, the employment scene **has not fully recovered** to pre pandemic levels.

Geopolitics I-V

Geopolitics Conceptual Evolution

The concepts of geopolitics have evolved in line with historical contexts and technological adoptions. There are four key characteristics of geostrategic thinking. First, it tends to propose an **expansionist strategy**. Second, contests over **specific geographical areas** often relate to strategic resources. Third, the ultimate aim is to achieve **hegemonic power**. Fourth, expansionist strategy often lead into **hegemonic wars**.

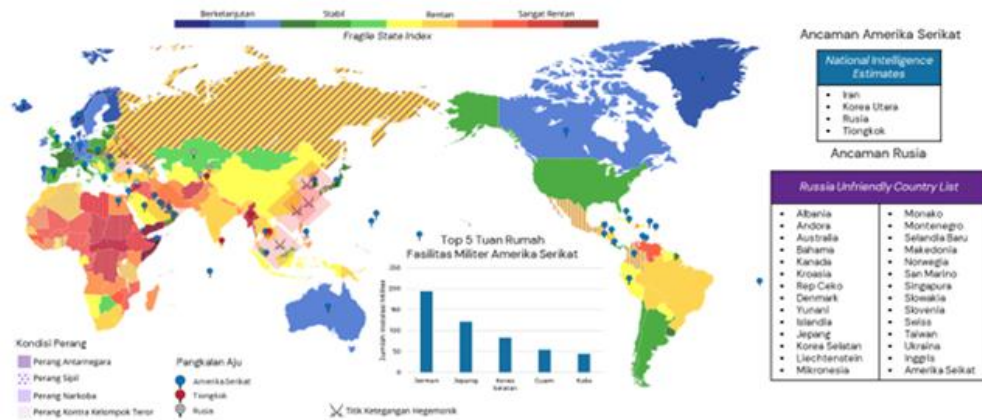

Hegemonic Conflict Hotspot

Currently, there are six hotspot areas prone to become a locus for hegemonic conflict: **South China Sea, Taiwan Strait, Diaoyou/Senkaku, Korean Peninsula, Persian Gulf, and Ukraine**. These hotspot areas are mostly located in Asia with China acting as a revisionist power. The United States presents as a status quo power in all hotspots area. As a hegemonic power, the United States has interests to maintain its political, economic, and military predominance.

Global Connectivity Rivalry

A core component of global politics in **Geopolitics V** era lies on the competition for **connectivity**. Recent strategic rivalries between **U.S.** and **China** are an illustration of this competition. On its part, Beijing has initiated the **Belt and Road Initiative (BRI)** promoting infrastructure development and placing the country at the heart of Asian trade. On the other hand, the U.S. proposed an **Indo-Pacific Economy Framework**. The idea is to establish a solid regional economy by enacting structural reform in Asia-Pacific countries.

In similar vein, the operationalization of the multimodal **International North-South Transport Corridor (INSTC)** become an important strategy for **Russia** to adjust its logistics needs. INSTC may imply a major geopolitical change in the region as it competes with the previously EU-initiated **Transportation Corridor Europe Caucasus Asia (TRACECA)** in terms of connecting Europe to Asia.

Strategic Leadership amidst Geo V Era

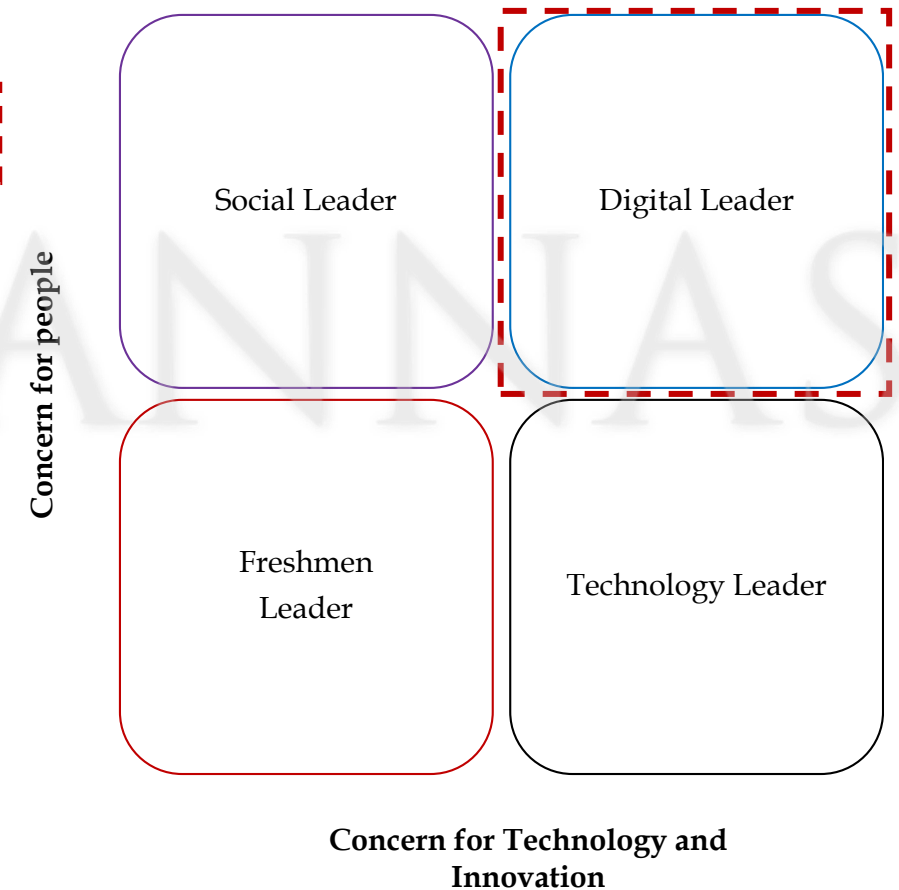

Basis for Decision Making

Decision Making Base	Leadership Rank	Military/Police	ASN	Private
Carl Von Clausewitz (Art of War)	Strategic	Komandan Korps/ Kogabwilhan	JPT Madya	CEO
	Operational	Komandan Divisi	JPT Pratama	Director
Antoine Henri Jomini (Science of War)	Tactical	Komandan Brigade/Batalyon	Administrator	Manager
	Technical	Komandan Kompi	Supervisor	Unit Leader

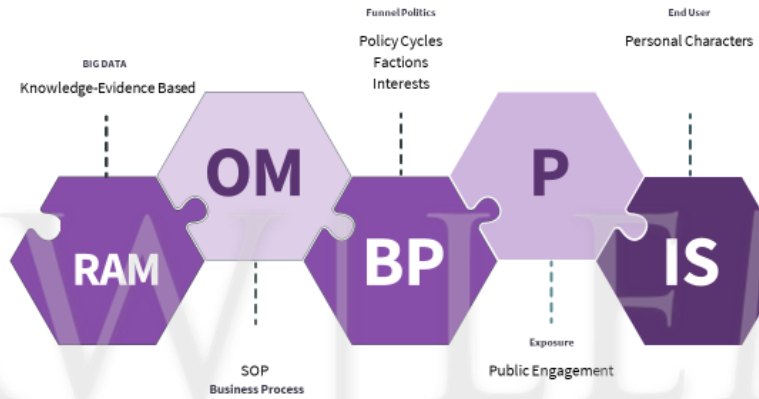

At the strategic leadership level, the study has to be **policy-oriented**. Strategic leadership should focus on the **art** to get the best output, instead of **technical** or **tactical** in the decision-making process or policy implementation.

Oberer and Erkollar provide the digital leadership model which is a **main instrument** amidst Geo V era. Digital Leadership model assist leader to decide rapidly, accurately, cross-hierarchically, and cooperatively with team-oriented. This model is considered as **the most suitable** one to risk mitigation needs, particularly for an urgent issue.
