## Susi Pudjiastuti briefs her achievement in three years as Maritime Affairs and Fisheries Minister

**T**he presence of Maritime Affairs and Fisheries Minister Susi Pudjiastuti in the PPSA XXI class at the Bhinneka Tunggal Ika Pancagatra Lemhannas RI, Wednesday (25/10), gave a different vibe. She briefed the PPSA XXI participants about the current development of maritime and fisheries in Indonesia, especially in the three years of her tenure as minister.

She claimed the changes occurred in the maritime and fisheries sector in Indonesia was very significant as on the fishing by foreign vessels. “These changes were almost like a revolution if we see it from the fishing condition in Indonesia. There were more than ten thousand foreign vessels, including that has been turned into Indonesian-flag vessel or still with their own flag, or vessel without flag from other states; they operated in the Indonesian territorial sea,” explained by Susi, who owns Susi Airlines.

As said by Susi, based on the National Committee of Fisheries Studies reports, the fish stock in Indonesia territory rise up from 6,5 million tons to 12,54 million tons. “If we calculate this incredible rising; 6 million tons times US\$1 dollar, we have US\$ 6 million. It means around Rp10.000 trillion,” she concluded.

The other good news is the fishermen’s purchasing power and the fisheries industry rate are also raising significantly. “We manage to raise the fishermen’s purchasing power from 104 to 110. The fisheries industry rate also rises from 103 to 120,” Susi said based on the data from the Central Statistics Agency (BPS) and Bank of

Indonesia (BI).

The other policy breakthrough that had caused controversy and rejection of fishermen community is Maritime Affairs and Fisheries Ministerial Regulation No. 56/2014 about the Moratorium of Fishing Licenses in the Indonesia Fishing Territorial Management which bans foreign fishing vessels and ex-foreign fishing vessels to operate and explore Indonesian sea.

Besides, Susi also imposed transshipment ban since 2014 by issuing Maritime Affairs and Fisheries Ministerial Regulation No. 57/2014 about transshipment. “The reason behind the ban because Indonesia is as a sovereign state and having ports, navy, marine police; transshipment in the middle of the ocean is not permitted. Meanwhile, transporting the fish catch is not part of the transshipment,” Susi explained. The purpose of this regulation is to control and to prevent the illegal fishing practices which is estimated to cost up to Rp30 trillion per year.

Susi Pudjiastuti did not deny that it is true there are many foreign vessels that catching fish illegally in Indonesian water (illegal fishing). She hopes that those vessels won’t come back to Indonesia. “It is true, there are huge numbers of giant vessels sails in our territory, and I don’t want them to come back again later because it makes our natural resources unrenewable,” Susi said. In this occasion, Susi who born in Pangandaran, expressed her wish to the PPSA XXI participant as the future national leaders to support her deeds in returning Indonesia to be a maritime axis of the world. ●
