JAKARTA - Lemhannas RI held a Focus Group Discussion (FGD) on "Constitution in the State Administration of the Republic of Indonesia" on Wednesday (20/9) in the Kresna Room, Astagatra Building, 4th Floor, Lemhannas RI. This FGD was carried out in order to prepare strategic and systematic policy recommendations to be submitted to the President of the Republic of Indonesia.

Since the reform period, the 1945 Constitution has undergone four amendments. However, after more than 20 years, the fourth amendment is still the final amendment until today and the idea of the fifth amendment has not been realized. The Fifth Amendment is often suspected of merely serving political

purposes. In fact, amendments are felt to be necessary considering that the world's strategic and geopolitical environment has changed significantly compared to the beginning of the reform.

On several occasions, the People's Consultative Assembly (MPR RI) said that discussing the fifth amendment was an urgent matter. In fact, since the MPR RI for the 2014-2019 period, an Ad Hoc committee has been formed to discuss limited amendments to the constitution. "The committee proposes to formulate state policy and give the MPR RI the authority to reject the APBN Bill if it conflicts with state policy," Deputy Governor of Lemhannas RI Vice Admiral Maman Firmansyah.

In discussing the above matters, present as a speaker were the Deputy Chairman of the Indonesian Constitutional Court, Prof. Dr. Saldi Isra, S.H.; Special Staff for Political and Institutional Communications of the Minister of State Secretary of the Republic of Indonesia Nicolaus Teguh Budi Harjanto, S.I.P., M.A., Ph.D.; Constitutional Law Researcher and Founder of the Center for Law and Policy Studies, Bivitri Susanti, S.H., M.M. JAKARTA - Lemhannas RI through the Directorate of Economic Studies and Natural Resources (SKA) held a Focus Group Discussion (FGD) with the title "Preparing a Nuclear Power Plant (PLTN) Roadmap in the Context of Realizing National Renewable Energy" on Monday

(25/9), in the Kresna Room, Astagatra Building, 4th Floor , Lemhannas RI.

In his speech, Deputy for Strategic Studies of Lemhannas RI Prof. Dr. Ir. Reni Mayerni, M.P. said that Indonesia is experiencing quite a

complicated problem recently such as worsening air quality which can be seen through the smog that covers the capital's skyscrapers every morning.

This pollution is caused by various factors, such as vehicle gas emissions and also industrial activities in Greater Jakarta, especially those that use coal in the manufacturing industry and electricity resources sectors. The existence of several operating steam power plants (PLTU) around Jakarta, coupled with increased vehicle gas emissions and industrial activities, has triggered a decrease in air quality.

This is a serious concern considering the impact of Steam Power Plant pollution on the environment and human health. "So strategic steps are needed to develop energy infrastructure where an energy transition is carried out from using coal plants to environmentally friendly plants," Reni Mayerni said.W

The event was moderated by the Director of Economic Studies and Natural Resources Commodore Ocktave Ferdinal, S.T., M.Sc. (Han)., CHRMP., CFrA, while several speakers were present, namely Acting Head of BRIN RI Nuclear Reactor Technology Research Center Dr. Eng.
